

Dr. SCOTT BASSETT

Dr. Bassett is an Assistant Research Professor at the Desert Research Institute. His research centres on the use of geographic information systems to address future land use/land cover change and the subsequent effects on environmental resources. Past research includes alternative futures analysis and other environmental assessments in Azerbaijan, Germany, Mexico, and numerous locations in the United States. Currently, he is working on land use/land cover change along the Gold Coast, Australia and is involved in characterizing the geomorphic properties of the world's deserts.
